

# ADVANCED Pebble Solutions®

*"The magic without the wand"*

APS introduces a new way of exposing quartz and pebble interior pool finishes.

APS formulas allow for a more controlled and even reveal of the desired aggregate texture. Each **Color-Coded Liquid Control Exposure Formula** uses water-based chemistry engineered for exposure control.

**LIQUID DEACTIVATOR FOR  
PEBBLE FINISHES**

**LIQUID DEACTIVATOR FOR  
QUARTZ FINISHES**

# ADVANCED Pebble Solutions®

*“The magic without the wand”*

## Benefits include:

- Eliminates the need for wand exposure, decreasing set up and overall job time
- Provides ability to expose on the same day of pebble/quartz install
- Optional Acid wash, same day filling
- Minimal Slurry, up to 90% less wasted cement
- Performs in hot and cold conditions

## “Must Haves”

Make sure you order the following:

1. Hose lube – 2 cups hose lube and 2.5-gallon water mix
2. High performance admixture – 22 lb. added into your batch
3. Liquid Exposure Control – 5-gallon bucket. Use in spray container. It covers up to 1500 sq ft. Repeat for additional exposure and reveal.

***WHEN ORDERING: Please specify PEBBLE or QUARTZ finish***
